MEMORANDUM FOR: Director of Central Intelligence

FROM

: F. W. M. Janney

Director of Personnel

SUBJECT

Agency Employee Survey

1. Two years have passed since we adopted a program to achieve greater uniformity of personnel management within the Agency. Much of this time has been devoted to reviewing and revamping personnel management methods and procedures. It is important that we now turn our attention to developing an ongoing effort to assess the results achieved against the objectives set.

- We have kept our employees informed of our plans and objectives as well as the actions we have taken toward their achievement. If management is to ascertain how well our personnel management programs are contributing to the accomplishment of the Agency's mission, employee perceptions become important. Therefore, our next step should be to develop and conduct a personnel questionnaire survey, a technique common to the personnel management evaluation process.
- We believe you share our concern that we continue the forward movement of the Agency's newly implemented personnel programs developed as a result of the recommendations made by the Personnel Approaches Study Group (PASG), a task force set up in late 1973 to study personnel management in the Agency. It is important that we communicate your concern to our employees and the best way to do this seems to be your endorsement of the Agency-wide survey which the Management Committee has approved. The survey represents a milestone critical to the achievement of the Office of Personnel DCI-level objective (OP-D-01-76).
- 4. For purposes of illustration a "skeleton" questionnaire is attached. It contains the primary elements effected by the new personnel policy. We would be pleased to include in it other areas of special interest to you. The survey would be administered to a 20-30 percent random sample of

Agency employees, which should be sufficient to obtain a significant cross section of employee views. Although we will have no basis for comparison with employee attitudes of a previous time period, we should be able to discern to some extent how PASG-inspired changes in Agency personnel management programs have impacted on employees. In addition, the survey would provide us a base line against which future evaluations and comparisons of employee perceptions of Agency personnel programs may be made.

5. It is recommended that you endorse the survey. The attached Bulletin informing employees of the survey is presented for your signature.
